Statements by the Republic of Kazakhstan on the Agenda Items of SCP/38

Agenda Item 4. International Patent System

Mr. Chair,

The Republic of Kazakhstan thanks the WIPO Secretariat for preparing document SCP/38/2, which provides information on certain aspects of national and regional patent legislation.

Kazakhstan attaches great importance to developing international cooperation in patent law and improving the transparency and accessibility of information on national patent systems.

In this regard, we welcome WIPO's work to systematize and update information on national and regional patent legislation. We believe that the exchange of information on legislative approaches and national practices contributes to the improvement of patent systems and enhances legal certainty.

The Republic of Kazakhstan supports the continuation of the Committee's work in this area.

Thank you, Mr. Chair.
