**Statements by the Republic of Kazakhstan on the Agenda Items of SCP/38**

**Agenda Item 9. Technology Transfer**

Mr. Chair,

The Republic of Kazakhstan expresses its appreciation to the WIPO Secretariat for preparing documents SCP/38/8 and SCP/38/9, addressing cross-border cooperation in innovation and technology transfer in the fields of health and green technologies.

Kazakhstan attaches great importance to promoting international scientific and technological cooperation, strengthening collaboration between research institutions and industry, and creating favorable conditions for the commercialization of intellectual property.

We recognize that effective technology transfer contributes to strengthening countries' innovation capacities, facilitating the adoption of new technologies, and expanding access to modern technological solutions. In this regard, we consider it important to examine existing legal and practical mechanisms for technology transfer, including the allocation of rights to the results of joint research and cross-border cooperation.

The Republic of Kazakhstan supports further exchanges of national experiences and best practices in this area, taking into account the interests and needs of countries at different levels of technological development.

Thank you, Mr. Chair.
